

The Booster Club offers two options to all organizations:

**Option #1: Utilization of equipment**

The Booster Club offers the utilization of its equipment to help make it easier for the organization to conduct concessions at their events.

Note: The event leader will need to be trained on use of equipment prior to the event by a Booster Club representative.

**Option #2: Utilization of equipment and supplies**

The organization would utilize the services of the Booster Club in supplying the equipment and supplies (drinks, popcorn, etc.). The organization would receive 30% of gross sales, which is the same program conducted for Booster Club sponsored events in which PHS clubs run the concessions.

Note: The event leader will need to be trained on use of the equipment and opening/closing procedures prior to the event by a Booster Club representative.

Any organization interested in either of the options must submit a request and receive approval from the Booster Club prior to the event. The organization in charge of the event must correct any damages or mistreatment of Booster Club equipment, however it will not be held accountable for normal wear and tear.
